

TECHNICAL DATA

Fluke ii910 and ii900 Acoustic Imagers

SOUNDSIGHT™ TECHNOLOGY

Acoustic Imaging

Blended live SoundMap™ with visual image

Frequency Range

ii900: From 2 kHz to 52 kHz ii910: From 2 kHz to 100 kHz

Detection Range

.5 m to >70 m (1.6 to >230 feet)* .5 m to >120 m (1.6 to >393 feet)*

Display

7 inch 1280 x 800 LCD with capacitive touchscreen

LeakQ™ Mode

Leak quantification: on-device estimated leak size and cost indication

MecQ™ Mode

Mechanical inspection: on-device feature to detect mechanical issues

PDQ Mode™

Partial discharge: on-device PD classification

SoundSight $^{\text{m}}$ refers to the Fluke technology of converting sound waves to a visual image.

*Depending on ambient conditions

The all-in-one tool you have been looking for to visualize leaks, partial discharge, and mechanical issues.

Leaks: hidden costs due to leaks in compressed air, gas, steam, and vacuum systems

While most manufacturers know that these types of leaks exist, it has been too time consuming and tedious to address them until now. With the Fluke ii900 or ii910 and minimal training, your maintenance technicians can begin checking for leaks during their typical maintenance routine—even during peak operation hours.

The ii900-series acoustic imagers let technicians see sound as they scan hoses, fittings, and connections for leaks. Its built-in acoustic array of tiny sensitive microphones generates a spectrum of decibel levels per frequency. Based on this output, an algorithm calculates a sound image, known as SoundMap™ that is superimposed on a visual image. The SoundMap is automatically adapted depending on the frequency level selected so that background noise is filtered out, making it incredibly simple to detect compressed gas leaks.

Finally a better way to detect compressed air, gas, steam and vacuum leaks. Plus, the ii910 provides increased sensitivity to detect leaks that are smaller or farther away.

Mechanical: first-line inspection to locate potential mechanical issues early and avoid unplanned downtime

Conveyor systems are a daunting maintenance problem because of the size and scope of the equipment and the nearly endless number of components that have the potential to disrupt production and cause unplanned downtime. Until now, it has been almost impossible to inspect the systems properly. The Fluke ii900 with MecQ revolutionizes inspection by enabling efficient scanning of large areas to detect and document potential issues for more targeted maintenance. With contactless scanning and advanced noise filtering, the Fluke ii910 Precision Acoustic Imager with MecQ™ Mode ensures safety and delivers clear images even in high-noise environments. By detecting areas of concern early on, it enables proactive measures to prevent costly problems, surpassing traditional methods. For professionals seeking seamless operation and proactive maintenance of large conveyance systems, the Fluke ii910 Precision Acoustic Imager with MecQ™ is the ultimate choice.

Partial discharge: the invisible threat... now you can see

Partial discharge is a serious issue that left unchecked can lead to arc flash fires, blackouts, explosions and danger to life. Whether you are inspecting insulators, transformers, switch gears or high voltage powerlines you need to be able to locate a problem quickly and easily. The Fluke ii910 Precision Acoustic Imager with PDQ Mode™

is a perfect tool for high voltage electricians, electrical test engineers, and grid maintenance teams because it translates the sound of partial discharge into visuals which pinpoint the location. The ii910's extended frequency range of 2–100Khz enables detection early of a potential problem to aid maintenance planning and prevention of catastrophic events.

Specifications

| Key features | ii910 | ii900 | Definitions | | |
|---|--|--|--|--|--|
| Sensors | | | | | |
| Frequency band | 2 kHz to 100 kHz | 2 kHz to 52 kHz | | | |
| Detection range | .5 m to >120 m (1.6 to >393 feet)* | .5 m to >70 m (1.6 to >230 feet)* | | | |
| Field of view | 63°: | , | | | |
| Nominal frame rate | 25 FPS | | The number of Frames Per Second (FPS) indicates the number of times the image on the screen is refreshed each second | | |
| Built-in digital camera (visible light) | | | | | |
| Field of view (FOV) | 63°± 5° | | | | |
| Focus | Fixed lens | | | | |
| Zoom | 3 x digital zoom | | | | |
| Resolution | 5 MP | 1.2 MP | | | |
| Display | | | | | |
| Size | 7" LCD with backligh | | | | |
| Resolution | 1280 x 800 (1,024,000 pixels) | | | | |
| Touchscreen | Capacitive | | Extremely precise and quick responding | | |
| Acoustic image | Yes, SoundMap™ image | | A SoundMap™ is a visual map of noise sources using an acoustical array | | |
| Image storage | | | | | |
| Storage capacity | 20GB (>5000 pictures / >999 videos) | | | | |
| Image format | Blended visual and SoundMap™.JPG or .PNG | | | | |
| Video format | Blended visual and SoundMap™.MP4 | | | | |
| Video length | Up to 5 minutes | | | | |
| Digital export | USB-C for data transfer | | | | |
| Acoustic measurem | ients | | | | |
| Measurement range (typical) | 12.1 to 114.6dB SPL (±1dB SPL 2kHz) 4.4 to 101.2dB SPL (±2dB SPL 19kHz) 12.8 to 119.2dB SPL (±1dB SPL 35kHz) 19.8 to 116.1dB SPL (±3dB SPL 52kHz) 41.4 to 129.0dB SPL (±1dB SPL 80kHz) 54.4 to 135.5dB SPL (±1dB SPL 100kHz) | 15.4 to 115.2dB SPL (±1dB SPL 2kHz) 5.6 to 102.5dB SPL (±2dB SPL 19kHz) 28.4 to 131.1dB SPL (±1dB SPL 35kHz) 41.8 to 133.1dB SPL (±3dB SPL 52kHz) | Sound pressure level (dB SPL) or acoustic pressure is the local pressure deviation from the ambient–decible and sound pressure level | | |
| Auto max/min dB gain | Auto or manual, user selectable | | | | |
| Frequency band selection | User selectable through user-made presets or manual entry | | | | |
| Classification and quantification | LeakQ™, MecQ™, and PDQ Mode™ Leak size and cost estimation / Mechanical inspection / Partial discharge type classification | LeakQ™ Leak size and cost estimation | | | |

| Key features | ii910 | ii900 | Definitions |
|---|---|--|---|
| Software | | | |
| Ease of use | Intuitive us | | |
| Trend graphs | Frequency and dB scale | | |
| Spot markers | dB level reading at center point of the image | | |
| Asset ID | QR code based asset ID identification | | |
| Asset inspection status | 'As left'; 'As found'; 'Undetermined' | | |
| Photo notes | Up to 4 photos notes for reference | | |
| Source | Show single or multiple sources | | |
| Profile | Preset capture profiles | | |
| Annotation Other | Asset name; Asset ID; Asset type; Leak type; Gas type; Pressure. | | |
| Leak values | Operating conditions; Weather notes | | |

Ordering information

FLK-ii910 Precision Acoustic Imager FLK-ii900 Industrial Acoustic Imager

Included

Imager; AC power supply and battery pack charger (including universal AC adapters); two rugged lithium ion smart battery packs; USB cable; rugged, hard carrying case; one rubber array cover; adjustable hand strap and adjustable neck strap.

Visit your local Fluke website or contact your local Fluke representative for more information.
