

G9301-II AC Voltage Detector

G9300 Series

GAZELLE G9301 II AC Voltage Detector. Easy to use AC non-contact voltage testers, just touch the tip to cable, electrical outlet, or supply cord. When the tip red light is ON and the unit beeps, you know there's voltage present. Best for electricians, maintenance technicians, safety officers, and anyone who needs to quickly check if the circuits is energized in the workplace or at home.

- Loud audible sound alarm for live cable detection
- Upon detection, tip red light glows and beeper sounds
- CAT IV 1000V for added protection
- Wide sensitivity range can detect 90 V to 1000 V AC
- Covered by One-year Gazelle warranty

Standard Accessories

- Operating Manual
- Batteries

Specifications	Range
AC Voltage (Low)	24V - 1000V
AC Voltage (High)	90V - 1000V
Frequency (Hz)	50/60Hz
Power	1.5V batteries (R03) × 2
Operating Mode	Automatic Induction
Spotlight Flashlight	White spotlight
Audible (buzzer) and visual (LED) indication	√
Auto power off	About 5 minutes
Low battery indication	√
